

## Notes on contributors

**Shane Burke** oversees the operation of the archaeology program at the University of Notre Dame Australia in Fremantle, Western Australia. His interests include the archaeology of stress-related behaviours and the archaeology of adaptation to new environments.

**Mary Casey** is an Honorary Research Associate, University of Sydney, a Director of Casey & Lowe for 25+ years, current President of ASHA and previous editor of *Australasian Historical Archaeology*. Mary has research interests in colonial-period Parramatta and Sydney, as well as urbanisation and housing, material culture and early locally-made pottery in Sydney.

**Hannah Craig-Ward** is a first class Honours graduate in historical archaeology from the University of Queensland. She is currently employed as a field archaeologist by Niche Environment and Heritage working on a major project in North Queensland.

**Denise Donlon** is a biological anthropologist and is a senior lecturer in the Discipline of Anatomy and Histology and curator of the Shellshear Museum of Physical Anthropology, University of Sydney. Research interests include forensic anthropology and taphonomy of the Sydney region, dental and postcranial skeletal variation and identification of non-human bones. She is a consultant to the NSW Department of Forensic Medicine and a member of the RAAF Specialist Reserves where she has a role in the recovery and identification of Australian war dead.

**Rebecca Griffin** is a bioarchaeologist at the University of Sydney, specialising in dental anthropology. Her research investigates health and longevity in modern and archaeological populations through study of the human dentition, with a particular focus on oral health and forensic anthropology.

**Tony Lowe's** archaeological career started out with work in the Middle East, on two student teams to Bahrain in the early 1980s, which was followed by employment in the Department of Antiquities, and fieldwork in Jordan and Iraq. After completing a MA at the University of London, more fieldwork was undertaken in Jordan, mainly on British projects. Since

1989, I have concentrated on historic archaeology, mainly in the Sydney area.

**Barbara Minchinton** worked as a librarian and administrator before completing a PhD on the history of land selection and settlement in the Otways (University of Melbourne). Since 2012 she has worked with Sarah Hayes, currently ARC DECRA Fellow at La Trobe University, on the urban archaeology of Little Lon.

**Tim Owen** is a Senior Research Fellow at Flinders University and a Senior Associate at GML Heritage. He has active research interests in Aboriginal and historical stable isotope analysis and cultural landscapes in South Australia and NSW.

**Nicholas Pitt** is a postgraduate student in history at the Australian National University. Before returning to study, he spent over five years working as a historical archaeologist for Casey & Lowe, Archaeology & Heritage Sydney. His research interests include early pottery made in colonial Sydney, historic landscapes and nineteenth-century landscape change, and innovative applications of digital methods to archaeological and historical practice. He has a BSc in Chemistry and BA(Hons) in Archaeology, both from the University of Sydney.

**Jonathan Prangnell** is a Reader in Archaeology and Cultural Heritage in the School of Social Science, the University of Queensland. His research interests include the development of capitalism in late nineteenth and early twentieth-century Queensland, and the study of taphonomic processes associated with historic period burials.

**Robyn Stocks** has been practicing archaeology for 35 years in Australia, the Middle East and Britain. Fieldwork highlights have included Aboriginal site survey, excavation of Bronze Age burial mounds and a range of multi-period settlement sites and urban landscapes. Her recent focus has been the detailed recording and analysis of artefacts from historical sites in Sydney and other locations in Australia as part of multi-faceted investigations. Research interests include looking at the ways colonial settlers adapted to living in a new land and how that is reflected in all aspects of material culture and the built environment.
